Hi Tina,

Thank you for sending the meeting invite and I am looking forward to connecting with you again as well. Below is the webex link and teleconference line for audio. I also attached the presentation from the workshop and the current version of the list of substances (not much has changed). You might be stuck with just me tomorrow as Nick is not feeling well this week. If it is OK with you, it might be best to skip the discussion about EDGES tomorrow but we can explore other calls to exchange information about tool development in our respective groups.

(See attached file:

Dear Matthew,

We are looking forward to hearing your presentation on Friday. Will you provide a webex/call link, or would you like us to set one up?

Thanks,

Tina

Hi Tina,

I forgot about SOT! Friday March 10th at 1:30pm works for us.

We will set up the webex and send the link and call-in details closer to the date.

All the best,
Matt

Matt,
Thank you so much – this is exactly what we would need. I am going to check calendars real quick from our end, but if I proposed Friday the 10th of March would that work for you and team? (The week of the 13th is SOT).

Thanks again for even allowing me to put a blemish on your over-stretched bandwidth!

Tina

Hi Tina,

It was nice seeing you at the meeting this past September!

Sorry for not responding earlier. It has taken me a little more time than I thought to get caught up on all Tara's activities as I transitioned into the acting role. She has some big shoes to fill even temporarily!

We received a similar request before from Tala's and Stan's groups right after the meeting. Nick and I provided an informal presentation to EPA technical staff (Daniel and Kristan) which walked them through the process. Then we shared the code with them to modify as they needed for their own purposes. Nick also walked them through informally the tech behind another tool that we have developed in house called EDGES (which is an automated search tool for exposure information). We had a great discussion about other informatics tools and what they were trying to do on their end. It was informal but useful to both groups. We would be happy to do the same with your group if that works for you.

The next few weeks are little busy over here with ongoing assessment work. Could we do this in March? Say sometime during the week of the 6th or 13th? We are pretty flexible on those weeks.

All the best,
Matt

Hi Matthew,

I wanted to check if you were interested in making this presentation, and what would work for you in terms of timing. I was thinking of finding 1-1.5 hours on our calendars for you to present and demo the 'LIST' or whatever you are calling it now, with some time for

discussion. Does this sound doable?

Many thanks,
Tina
